

APPENDIX

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

The claims are amended as follows:

--6. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the means for conducting electrical current comprise a first layer of metallic material resting on the flexible substrate and in that the first electrode comprises an anodic catalyst in contact with said first layer.

7. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the means for conducting electrical current comprise a second layer of metallic material resting on the electrolyte and in that the second electrode comprises a cathodic catalyst in contact with said second layer.

9. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the electrolyte is in the form of a membrane, in particular made of Naphion.

10. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the electrolyte has a composite structure comprising Naphion and zeolite.

11. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the means for conducting electrical current to the first electrode and the second electrode are in the form of metallic layers.

22. (Amended) The fuel-cell according to Claim 1 ~~or Claim 2~~, wherein the flexible substrate is in the form of a ribbon developing in length and capable of being rolled up.
